

Minimap::mousePressEvent

Minimap::viewChange

Minimap::renderMap

```
graph LR; A[Minimap::mousePressEvent] --> C[Minimap::renderMap]; B[Minimap::viewChange] --> C;
```

The diagram illustrates a signal-slot connection. Two white rectangular boxes on the left, labeled 'Minimap::mousePressEvent' and 'Minimap::viewChange', have blue arrows pointing to a single gray rectangular box on the right labeled 'Minimap::renderMap'. This indicates that both mouse press events and view changes trigger the rendering of the minimap.
